Information Disclosure Statement

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

Submitted herewith is a copy of the International Search Report issued by the European Patent Office, together with copies of the five references cited therein. Insofar as the relevance of the references is concerned, it will be noted that all of the references are indicated to be in the "A" category which is defined, in translation, as "Publication which defines the general state of the technology but is not to be viewed as particularly significant."

Likewise submitted is Form PTO 1449 which lists the five references. It will be noted that U.S. Patent No. 4,892,652 is, in the interests of accuracy, identified as "Rudy et al" Rather than as Hunnemann et al, which is how the patent is identified in the international search report.
